

# Group 7

---

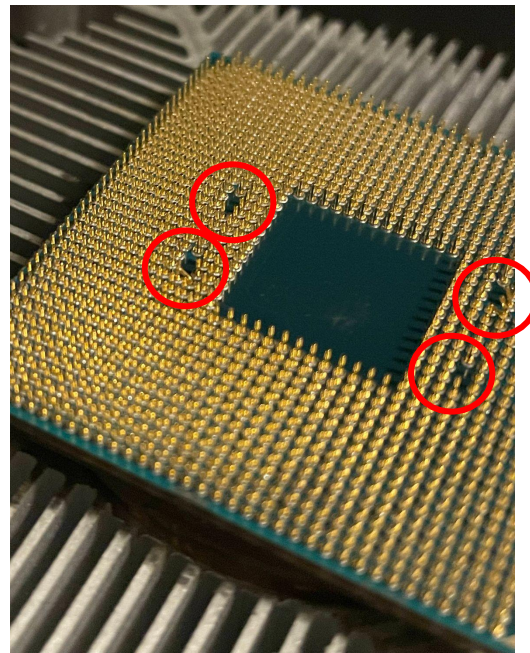

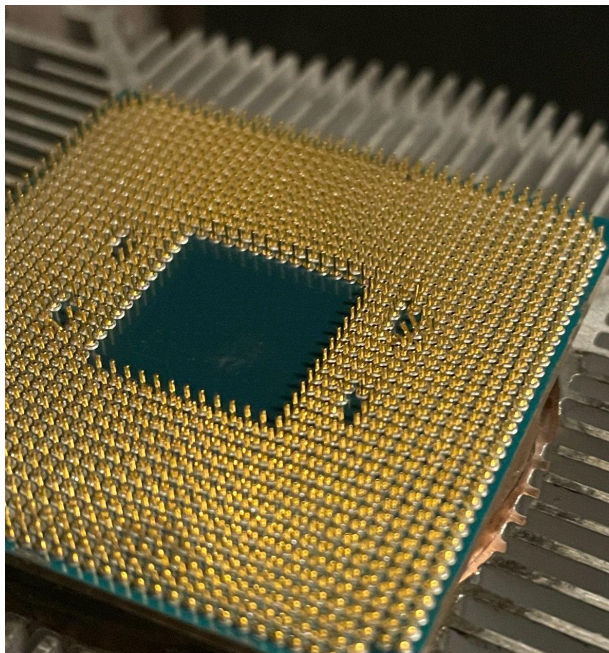

## Team Evaluation Project

- Adrian Vovk
- Evan Porter
- Kaiyuan Zheng
- Chris Zhao

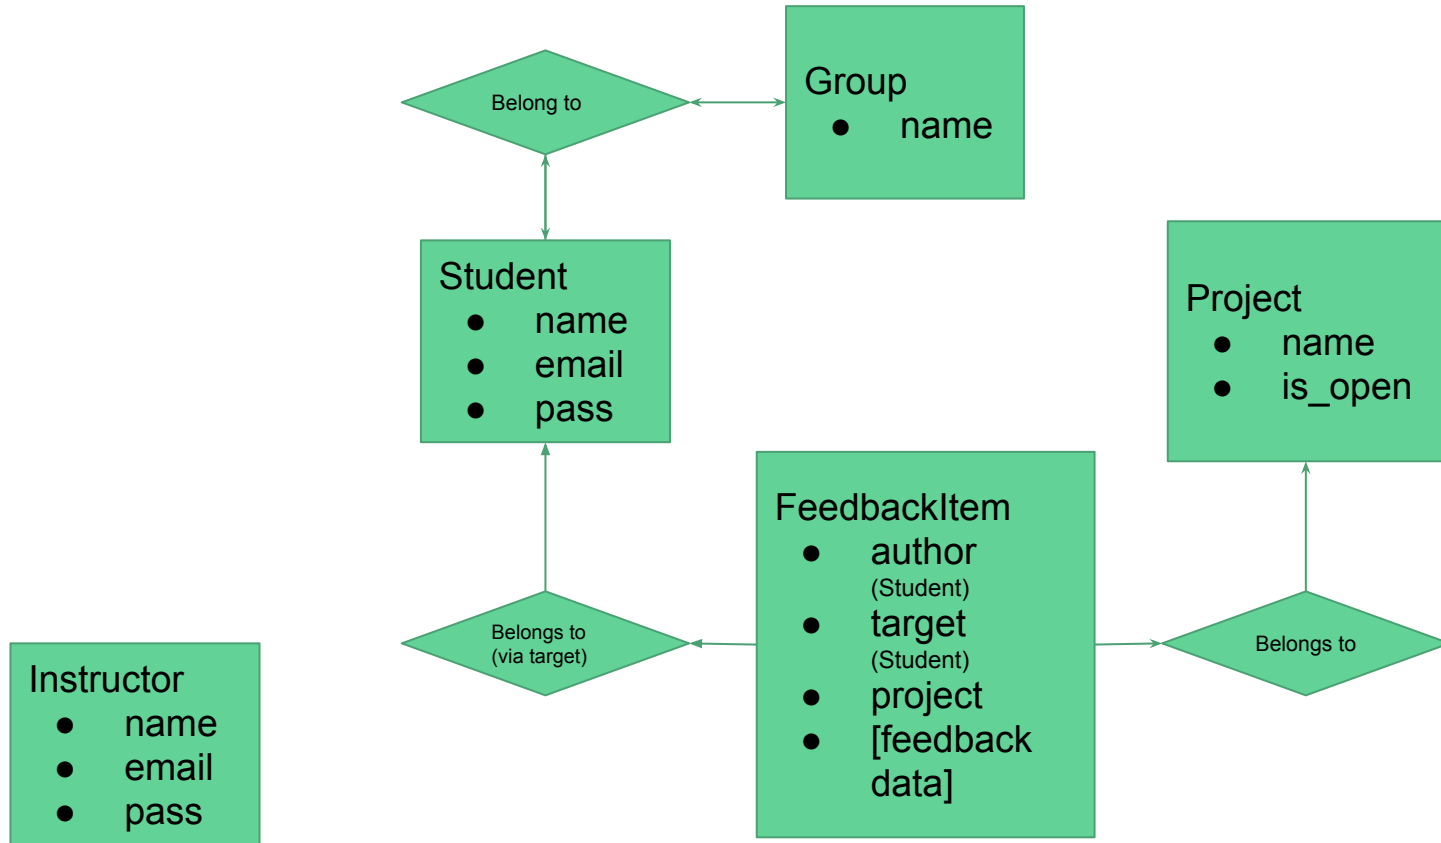

# Our Progress

1. Looking over requirements
2. Planning our database and routes
3. Writing controllers & basic views
  - a. Unforeseen difficulties...
4. Finding bugs & fixing them
5. Making it look nice with Bootstrap (wip)

# Unforeseen Difficulties

# Database

# Controllers

- Adrian Vovk
  - Application — landing pages/redirects
  - Evaluations — the “leaving feedback for everyone in your group” flow
    - FeedbackItems
- Evan Porter
  - Instructors
- Kaiyuan Zheng
  - Students
- Chris Zhao
  - Projects
  - Groups

Demo

# Remaining Tasks

- Finish restyling the website
- Find and fix any remaining bugs

## If we had another month, we would...

- Clean up the code (standardize style, make it more idiomatic, clean up db, etc)
- Password reset
- Using cookies to persist session
- Bulk-adding students and groups
- Securing account activations
- Creating projects that only some groups can see
- More than one class per instance of the server
- Profile customization (profile pictures, etc etc)

Thank You
